

Sand Springs Police-Fire Emergency Management Levee A—Evacuation Plan

Upon Notice from any authority recognized by the City of Sand Springs as having credible authority to warn of an impending or actual breach, the City of Sand Springs will activate the following evacuation plan.

1. Notification will be made to all businesses or citizens that have registered with our Emergency Phone Notification System. We will instruct the business that they should close immediately and ask all patrons and employees to exit the building and to drive or walk to be north of Highway 412/64.
2. We will send officers to expedite traffic to accomplish the goal of having all persons in the affected area to be North of Highway 412/64.
3. We will sound our Flood Warning Sirens for the entire City warning of the impending flood.
4. We will not allow any traffic other than rescue personnel to drive South of Hwy 412/64 or North on Hwy 97 from South Sand Springs.
5. We will assist all other agencies on mutual aid as resources allow. The area that will be warned will be as shown in this map:

The City of Sand Springs will provide a copy of this document to all affected businesses and the public at large so that they will be aware of the steps we would take, in the event of a breach.

The City will encourage all businesses to make their employees aware of these steps in case this plan would be implemented.

The City will also place officers and volunteers at a location close to 10th and Adams to receive people who are airlifted to safety during a breach event.

The City Emergency Operations Center will closely coordinate activities with TAEMA.
